

" I will lift up my eyes to the hills; From whence comes my help?  
My help comes from the Lord, Who made heaven and Earth"

Psalm 121

We are living a situation that shakes all of us human beings in almost the whole planet, it is not only a relative or a neighbour who is affected, we ALL are. It is time to consider and recognize how vulnerable we are, that we alone cannot, that we are not as self-sufficient as we think, we cannot control even a small unknown virus and much less life or death. We stay at home, watch the news and observe the entire planet collapse and becoming filled with fear because of this disease.

Overnight this virus (whether or not it is as alarming and dangerous as it is said) has really turned our lives upside down... and we thought we were so clever that we even dared to say that we are capable of prolonging the life of the human being... Do we really think that we can continue to ignore GOD and believe that we are the ones who have the power over all things, wanting to handle what is not of our concern, not recognizing GOD, not abiding by the divine law of the Creator?

Mankind is condemned to die sooner or later by a virus much more powerful and cruel than the one we are dealing with these days. The virus of SIN has infected us since we were born, teared us away from God and not just for a few days but for eternity. It leads us to eternal death. This is really serious. You may think: if God really existed, an all-powerful, all-knowing being and as we say, those of us who know him: "full of love and mercy", why does he allow so many calamities, wars and, and, and...? For it is precisely because away from His presence, far from His holiness, there is only darkness. The power of sin results in all that you in your heart are blaming God for. We live in a world filled with darkness because of sin because man is so very far from God.

**Let's turn our eyes to HIM, let's look for him!** No one knows the transcendency of this "global pandemic". The whole world is frightened, trying to protect itself; governments making decisions and taking action, in desperation. We don't know what will happen or the repercussions this will have. But what is certain is that GOD IS SOVEREIGN and that his LOVE for humanity is infinitely great. Today it is time for EVERY ONE OF US to turn TO GOD, give him the opportunity to change your life. He desires to fill your being with His LIFE and with His LIGHT. GOD does not want religion but a LOVE RELATIONSHIP, He does not want sacrifices but our heart. He already made the sacrifice on the cross in the person of His Son JESUS CHRIST, He opened the WAY for us to come to GOD. There is no other way, HE is the only one who died to give us ETERNAL LIFE AND PEACE that surpasses all understanding.

In these days where there's only talk of the virus spreading... there is an ANTIDOTE that brings HOPE AND INNER PEACE and it is JESUS, his death on the cross for you and me and HIS proven RESURRECTION that gives us the certainty that YES...there is something else... and that true life is in HIM. **CHRIST IS THE HOPE OF LIFE!! HE IS THE ETERNAL LIFE.**

**Today is not the time to FEAR but to CONSIDER and to TURN OUR EYES TO GOD.**

"Call to Me and I Will answer you, and show you great and mighty things, which you don't know" Jeremiah 33:3
